**(100) Service Quality Improvement Reporting
Data Collection Form**

FCC Form 481

OMB Control No. 3060-0986/OMB Control No. 3060-0819
July 2013

<010>	Study Area Code	522451
<015>	Study Area Name	WESTERN WAHIAKUM
<020>	Program Year	2015
<030>	Contact Name - Person USAC should contact regarding this data	Carol Larson
<035>	Contact Telephone Number - Number of person identified in data line <030>	3604652216 ext.
<039>	Contact Email Address - Email Address of person identified in data line <030>	clarson@west.net
<110>	Has your company received its ETC certification from the FCC?	(yes / no) <input type="radio"/> <input checked="" type="radio"/>
	If your answer to Line <110> is yes, do you have an existing § 54.202(a) "5	
<111>	year plan" filed with the FCC?	(yes / no) <input type="radio"/> <input type="radio"/>

If your answer to Line <111> is yes, then you are required to file a progress report, on line <112> delineating the status of your company's existing § 54.202(a) "5 year plan" on file with the FCC, as it relates to your provision of voice telephony service.

522451wa112.pdf

- <112> Attach Five-Year Service Quality Improvement Plan or, in subsequent years, your annual progress report filed pursuant to 47 C.F.R. § 54.313(a)(1). If your company is a CETC which only receives frozen support, your progress report is only required to address voice telephony service.

Name of Attached Document

Please check these boxes below to confirm that the attached documents(s), on line 112, contains a progress report on its five-year service quality improvement plan pursuant to § 54.202(a). The information shall be submitted at the wire-center level or census block as appropriate.

- <113> Maps detailing progress towards meeting plan targets
- <114> Report how much universal service (USF) support was received
- <115> How (USF) was used to improve service quality
- <116> How (USF) was used to improve service coverage
- <117> How (USF) was used to improve service capacity
- <118> Provide an explanation of network improvement targets not met in the prior calendar year.

Western Wahkiakum County Telephone Company
Five-Year Service Quality Improvement Plan

Western Wahkiakum County Telephone Company ("Company") serves a rural area of approximately 314 square miles with an average population density of approximately 6.2 per square mile. This area is very rural and contains no incorporated towns or cities. The Company is in the midst of a fiber-to-the-home project for its serving area.

At this time, the Company is able to offer broadband service meeting the current minimum broadband obligations adopted in the USF/ICC Transformation Order (FCC 11-161) to all occupied portions of its territory. The Company's plans are to complete the above-mentioned fiber-to-the-home project as soon as feasible to improve its services. However, in light of the current regulatory uncertainties, the Company may scale back the timing of portions of the project and look to complete it in a 5- to 7-year period. The work included in the below five-year service quality improvement plan will further enhance the reliability, speed and capacity of the Company's broadband service offerings as well as its voice telephone service offerings. Regardless of the timing for completion of its fiber-to-the-home project, the Company expects to continue to be able to provide to all applicants for its broadband service within its service area broadband service that meets the current obligations set forth in the USF/ICC Transformation Order and the Commission's rules promulgated thereunder who (i) also apply for its local exchange telephone service and (ii) satisfy the customer requirements set forth in the Company's filed and effective tariff applicable to local exchange telephone service.

Set forth below is a description of the Company's current five-year service quality improvement plan. Execution of this plan is dependent upon the availability of adequate funding and assumes the deployment of currently-existing technology. Evolution of technology, available applications, and customer service expectations during the five-year plan life may lead to modification of the plan from time to time during that five-year

2015:

- (1) Construction of new, buried fiber optic routes within the Grays River Wire Center, along sections of Mattson Road (for approximately 7,300 feet), Pillar Rock Road (for approximately 3,870 feet), Hoikka Road (for approximately 5,444 feet), and Eden Valley Road (for approximately 10,000 feet), for a total distance of approximately 26,614 feet. This project is expected to serve an area of approximately 5 square miles in the vicinity of the above-mentioned roads, with an estimated population of 85. This project is expected to be executed in 2015, and the cost expected to be incurred in 2015 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.

- (2) Construction of new, buried fiber optic routes within the Grays River Wire Center, along Altoona Pillar Rock Road (for approximately 9,722 feet) and Barr Road (for approximately 12,780 feet), for a total distance of approximately 22,552 feet. This project is expected to serve an area of approximately 7 square miles in the vicinity of the above-mentioned roads, with an estimated population 87. This project is expected to be executed in 2015, and the cost expected to be incurred in 2015 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.

2016:

- (1) Construction of new, buried fiber optic routes within the Grays River Wire Center, along sections of Mill Road (for approximately 8,924 feet), Altoona Pillar Rock Road (for approximately 3,022 feet), Larson Road (for approximately 800 feet) and Fossil Creek Road (for approximately 5,784 feet), for a total distance of approximately 17,730 feet. This project is expected to serve an area of approximately 4 square miles in the vicinity of the above-mentioned roads, with an estimated population of 34. This project is expected to be executed in 2016, and the cost expected to be incurred in 2016 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.
- (2) Acquisition and installation of software-enabled switching apparatus to serve the Naselle and Grays River Wire Centers, to replace existing digital switching facilities. This project is expected to be executed in 2016, and the cost expected to be incurred in 2016 for this project is estimated to be approximately \$ 238,000. This project is expected to serve an area of approximately 314 square miles, with an estimated population of 1,900. This project is expected to enhance service offerings, reliability and capacity for the above-mentioned population.

2017:

- (1) Construction of new, buried fiber optic routes within the Grays River Wire Center, along sections of Altoona Pillar Rock Road south of Eden Valley Road (for approximately 20,000 feet). This project is expected to serve an area of approximately 4 square miles in the vicinity of the above-mentioned roads, with an estimated population of 41. This project is expected to be executed in 2017, and the cost expected to be incurred in 2017 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.
- (2) Construction of new, buried fiber optic routes within the Grays River Wire Center, along Altoona Pillar Rock Road (for approximately 15,354 feet). This project is expected to serve an area of approximately 4 square miles in the vicinity of the above-mentioned roads, with an estimated population of 58. This project is expected to be executed in 2017, and the cost expected to be incurred in 2017 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.

2018:

- (1) Construction of new, buried fiber optic routes within the Grays River Wire Center, along a section of Covered Bridge Road (for approximately 20,000 feet), and Shannon Road (for approximately 13,600 feet), for a total distance of approximately 33,600 feet. This project is expected to serve an area of approximately 6 square miles in the vicinity of the above-mentioned roads, with an estimated population of 75. This project is expected to be executed in 2018, and the cost expected to be incurred in 2018 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.
- (2) Construction of new, buried fiber optic routes within the Grays River Wire Center, along Deep River Road (for approximately 13,000 feet). This project is expected to serve an area of approximately 2 square miles in the vicinity of the above-mentioned road, with an estimated population of 56. This project is expected to be executed in 2018, and the cost expected to be incurred in 2018 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.

2019:

- (1) Construction of new, buried fiber optic routes within the Grays River Wire Center, along a section of Deep River Road (for approximately 14,000 feet). This project is expected to serve an area of approximately 2 square miles in the vicinity of the above-mentioned road, with an estimated population of 31. This project is expected to be executed in 2019, and the cost expected to be incurred in 2019 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.
- (2) Construction of new, buried fiber optic routes within the Grays River Wire Center, along Deep River Road (for approximately 14,000 feet). This project is expected to serve an area of approximately 2 square miles in the vicinity of the above-mentioned road, with an estimated population of 22. This project is expected to be executed in 2019, and the cost expected to be incurred in 2019 for this project is estimated to be approximately \$250,000. This project is expected to enhance service reliability and capacity for the above-mentioned population.

FCC Form 481 (July 2014), Line 510
Description of Processes and Procedures to Ensure
Compliance with Service Quality Standards and
Consumer Protection Rules Per Instructions
for Completing FCC Form 481 Instructions

This document details the processes and procedures that Western Wahkiakum County Telephone Company (the "Company") follows to ensure compliance with service quality standards and consumer protections rules as set forth in the Instructions for Completing FCC Form 481. It applies with respect to both the Company's voice telephony service and the Company's broadband service.

For service quality standards that are affected by plant issues, the Company engineers and installs its plant and other facilities in such a way as to ensure, to the greatest extent possible, compliance with service quality standards that exist at the time that the plant and facilities are constructed. Plant is augmented, upgraded and/or reconfigured as needed.

In addition, Company employees are periodically briefed on issues involving service quality standards and consumer protection rules. In particular, if any set of issues appears to be prevalent, employees are given briefings on how to handle such issues.

The Company also periodically reviews its operating procedures to be sure that those operating procedures are in compliance with service quality standards and that the operating procedures are not in violation of consumer protection rules. If questions arise, legal counsel is sought as needed.

If a complaint pertaining to the Company's compliance with service quality standards or consumer protection rules are received by the Company, the complaint is promptly investigated, the matter tracked and any corrective action noted. This process ensures that issues involved in the matter are addressed and corrections made, if needed. It should be noted that the Company has received no customer complaints in the past five years regarding service quality standards or consumer protection rules as they relate to the service offered by the Company other than call completion issues, which are not caused by the Company.

FCC Form 481 (July 2014), Line 610
Statement Describing Ability to Function
in Emergency Situations Per Instructions
for Completing FCC Form 481

At line 600 of FCC Form 481, Western Wahkiakum County Telephone Company the "Company") certified that it is able to function in emergency situations as set forth in 47 C.F.R § 54.202(a)(2). This means that the Company has a reasonable amount of back-up power to ensure functionality without an external source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations. This statement describes how the Company is prepared to provide continued service in an emergency situation and applies with respect to both the Company's voice telephony service and the Company's broadband service.

The Company's network providing voice telephony and broadband service includes two (2) central offices and twenty-two (22) digital loop carrier sites ("DLCs"). The two central offices are equipped with back-up batteries having a capacity to provide reserve power in the event of a power outage for up to approximately eight (8) days, while the DLCs are equipped with batteries having a capacity to provide reserve power in the event of a power outage for up to approximately two (2) days. The Company also maintains fixed back-up power generators at its two central office locations and at the locations of three of its more significant DLCs. There are automatic power transfer switches at each of those five locations, so in the event of a commercial power failure, the transfer to back-up power should occur seamlessly. The Company also maintains three (3) portable generators to be transported to the remaining locations, if needed. All locations are subject to status alarm monitoring that is connected to the Company's principal central office.

The Company has three (3) fiber cable rings that provide redundancy and diversity connecting the Company's principal switching facilities with one another and connecting a number of the remote DLC locations with their serving switching facility. The Company's broadband service also utilizes these fiber cable rings for transmission and benefits from the redundancy and diversity they provide.

Each of the Company's fiber-connected sites has built in redundancy for fiber transceivers. Most of the Company's switching and other electronic/optronic equipment utilized in providing voice telephony service and broadband service has some redundancy built in, and the Company keeps critical-spare replacement components on hand. The Company also subscribes to support service from the principal vendors of its switching and transmission equipment.

The Company has system redundancy for interexchange access service circuits (including as utilized by its affiliate to provide long distance service), E-911 trunking and SS7 signaling circuits.

Most of the Company's outside plant cable and wire is buried and thus protected from most weather events. The Company's central office switch capacity is engineered to accommodate traffic spikes, and its interexchange facilities also have the capacity to provide additional circuits for interexchange carriers should the need arise. The existing 120 interexchange trunks serving interexchange carriers provide a substantial margin of safety for traffic spikes and may be utilized for the traffic of all interexchange carriers to whom the Company provides switched access service. The middle-mile broadband capacity presently available to the Company substantially exceeds the current busy-period through-put requirements of the Company's installed broadband service, and thus is believed by the Company to provide adequate reserve capacity for potential broadband traffic spikes.

In the case of isolated groups of customers that may suffer damage due to a cable cut, the Company maintains sufficient staff and other resources to be able to put customers back in service in a very short amount of time, subject to road accessibility and environmental limitations. The Company's emergency service equipment is located within its service area and requires very little time to dispatch.

FCC Form 481 (July 2014), Line 1210
Terms and Conditions of Voice Telephony Service Plan
Offered to Lifeline Subscribers
Per Instructions for Completing FCC Form 481

Discounted Telephone Service Available

Wahkiakum West Telephone provides Lifeline and Washington Telephone Assistance Program (WTAP) Benefits to qualified subscribers in Grays River, Naselle and Rosburg.

You may qualify for WTAP and/or Lifeline Service if you meet certain low-income eligibility requirements. WTAP benefits include a discount of \$3.25 per month on basic residential telephone service. Lifeline benefits include a discount of \$9.25 per month.

Customers of Wahkiakum West receiving both Lifeline and WTAP credits pay only \$8.00 per month for basic local telephone service not including taxes and surcharges.

WTAP benefits also include discounting one half of the connection fee up to \$22 when activating or moving service.

Line 1222 Details on the number of minutes provided as part of the plan.

The Company provides flat rate local exchange service to its Lifeline subscribers. It does not offer measured local exchange service or measured Extended Area Service ("EAS"), so the number of local exchange service and EAS minutes that are provided as part of the Lifeline plan is essentially unlimited. EAS exists between the Company's Grays River and Naselle exchanges.

Line 1223 Additional charges for toll calls, and rates for such plan.

The Company does not provide toll services to its Lifeline subscribers, but does provide access to toll service providers. Company Lifeline subscribers have to choose their own toll service providers. Accordingly, subscribers to the Company's Lifeline service do not incur any Company toll charges, but they do incur for toll calls the charges of the toll service providers they select. No Company charges, other than those for the local exchange service and EAS that is included in the Company's Lifeline plan are required in order for a qualifying low-income consumer to receive Lifeline service from the Company.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0372-0031. The time required to complete this information collection is estimated to average 4 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
